

Team One

Genre: Two-player fixed shooter game

Description:

This game is about being either the pragmatic Federal Android Police (also known as F.A.P. or “fappers”) or the Crooks (ruthless criminals). The game starts with both players on opposite but equal sides divided by rows of defenseless civilian vehicles during a high speed chase.

After all the civilians are cleared the game becomes a PvP match. The winner gains bonus points which are used post-level to purchase power ups for the following round. Spending points takes away from the player’s total point score but is a vital advantage needed to outscore your opponent. The player who reaches 10,000 points first wins!

Features:

- Purchasable Power ups
